# 3D Systems Demonstrates
# Accessible 3D Content-To-Print Solutions at SolidWorks World

## - Democratizing Access and Accelerating Adoption Through Affordable Utility -

**ROCK HILL, South Carolina, January 20, 2011 –** 3D Systems (NASDAQ: TDSC) announced today that it will showcase its latest personal and professional 3D printers along with its expanded 3Dproparts™ menu of services at SolidWorks World 2011, January 23rd – 26th at the Henry B. Gonzalez Convention Center in San Antonio, Texas, booth 617.

Through its expanded portfolio, the company plans to demonstrate how it is leading and shaping the democratization of access to its 3D content-to-print solutions. 3D Systems plans to showcase its entire personal and professional 3D printer portfolio, including the recently announced ProJet™ HD3000 *Plus*.  To further illustrate its commitment to bring affordable 3D solutions to the marketplace, the company will present its sub $5,000 Bits From Bytes 3D Printers and 3D Printer Kits.  SolidWorks World attendees will be invited to experience the capabilities of 3Dproparts™ online and to download 3D Systems recent iPhone mobile app for viewing and sharing 3D content on the go.

"We are pleased to share our growing portfolio of personal and professional 3D printers and 3Dproparts™ solutions with such an important gathering of 3D content-to-print practitioners at SolidWorks World," said Cathy Lewis, vice president, global marketing for 3D Systems.  "As we begin celebrating 25 years of 3D Systems' innovations, we pledge to accelerate adoption and democratize access to affordable and

innovative 3D content-to-print solutions and we are grateful to SolidWorks users for the enormous support they have given us over the years."

## About 3D Systems Corporation

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, parts and production systems.  Its expertly integrated rapid prototyping and manufacturing solutions reduce the time and cost of designing new products and printing real parts directly from digital input.  These solutions are used to design, communicate, prototype and produce functional end-use parts; customers create with confidence.
