3D Systems Presents Its Breadth Of Additive Manufacturing Capabilities

- Latest Parts, Printers And Production Systems On Display At Rapid 2010 -

ROCK HILL, South Carolina – May 17, 2010 - 3D Systems (NASDAQ: TDSC) announced today that it plans to exhibit and present the benefits of its growing Additive Manufacturing capabilities at the [RAPID 2010 Conference and Exposition](#). The company's suite of design-to-manufacturing solutions and services will be on display at the Disneyland Hotel May 18-20, 2010 in Booth 403.

The company plans to discuss and share its growing success in this area by delivering a presentation titled *"Using SLS® to Manufacture Aerospace Parts"* at the conference. The presentation will be delivered by Scott Turner, 3D Systems' vice president sales, 3Dproparts and make use of actual customer case studies to highlight [3D Systems'](#) Rapid Manufacturing experience and success through a series of part examples. 3D Systems has been leading the adoption of large scale custom manufacturing solutions in aerospace, defense, and transportation for over a decade. More recently the company developed rapid manufacturing solutions for a variety of dental and medical device applications. 3D Systems Rapid Manufacturing Solutions are completely transforming Dental Labs and Medical Appliance Manufacturers' workflow, costs and lead-times away from heavy reliance on labor intensity and craftsmanship and into the digital age.

"Rapid Manufacturing Solutions cover a wide range of applications and increasingly includes the use of our [3-D Printers](#) along with our [Production Systems](#) and [3Dproparts™](#) Service," said Cathy Lewis, 3D Systems vice president of global marketing. "We are beginning to experience the early signs of a clear migration from prosumer to consumer applications which includes the use of our accessible and affordable 3-D Printers and specially engineered materials."

"Using SLS® to Manufacture Aerospace Parts" is scheduled to be presented on Tuesday, May 18th between 1:40-2:15 PM as part of the conference program. Attendees may register for the conference at RAPID 2010 Conference & Exposition.

Forward-Looking Statements

Certain statements made in this release that are not statements of historical or current facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the company to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. In addition to statements that explicitly describe such risks and uncertainties, readers are urged to consider statements in the conditional or future tenses or that include terms such as "believes," "belief," "expects," "estimates," "intends," "anticipates" or "plans" to be uncertain and forward-looking. Forward-looking statements may include comments as to the company's beliefs and expectations as to future events and trends affecting its business and are necessarily subject to uncertainties, many of which are outside the control of the company. The factors described under the headings "Forward-Looking Statements," "Cautionary Statements and Risk Factors," and "Risk Factors" in the company's periodic filings with the Securities and Exchange Commission, as well as other factors, could cause actual results to differ materially from those reflected or predicted in forward-looking statements.

About 3D Systems Corporation

3D Systems is a leading provider of 3D Printing, Rapid Prototyping and Manufacturing systems and parts solutions. Its expertly integrated solutions reduce the time and cost of designing products and facilitate direct and indirect manufacturing by creating actual parts directly from digital input. These solutions are used for design communication and prototyping as well as for production of functional end-use parts: Our customers Create With Confidence.
