3D Systems Showcases Latest
3D Content-to-Print Solutions At DMS

- See Demonstrations Of Latest ProJet And Cube® 3D Printers
- Experience New, Intuitive Scan And Design Software Workflows

ROCK HILL, South Carolina, June 19, 2013 – 3D Systems (NYSE:DDD) today announced that its 3D authoring software tools from Geomagic® Solutions will be on display along with its personal and professional 3D printers at the Design Engineering & Manufacturing Solutions Expo (DMS), Japan's largest exhibition which will be held June 19 – 21, 2013, at the Tokyo Big Site Convention Center in Tokyo, Japan. 3D Systems is located in booth #25-30.

Visitors will experience hands-on workflows that take 3D scans into intuitive CAD and Voxel modeling software tools that ensure 3D printability. 3D Systems will demonstrate its leading ProJet® professional and personal 3D printers, highlighting the new ProJet x60 series ColorJet printers with over one million unique colors. Experts from 3D Systems and local partners will be available to discuss production 3D printing, exclusive 3D printing materials, and attendees' design to manufacturing requirements.

"With our growing set of 3D content creation tools from Geomagic Solutions, we are reinventing the engineer's desktop and giving customers guaranteed access to the most comprehensive portfolio of 3D printers, materials and software in the market," said Cathy Lewis, Chief Marketing Officer, 3D Systems. "Our 3D content-to-print solutions empower professionals and individuals to imagine, design and produce parts and products quickly and accurately from idea to manufacturing."

About 3D Systems

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials and on-demand custom parts services for professionals and consumers alike. The company also provides CAD, reverse engineering and inspection software tools and consumer 3D printers, apps and services. Its expertly integrated solutions replace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, create, communicate, prototype or produce real parts, empowering customers to create and make with confidence.
